

About

This assignment is a part of screening process for candidates who applied for a role at our organization.

Dataset

You can use your own datasets.

Background

You have been provided with paper on personalization, Paper_Round1_Assignment 2 (of 2)_AI.pdf.

Problem

You need to design (micro level) & develop (macro level) personalization engine based on paper.

Submission

You are required to submit results and further demonstrate online end-to-end solution (code & report) in Python (Scikit-learn and/or Tensor Flow).

Evaluation

You shall be scored on the following:

1. Width
2. Depth
3. Accuracy
4. Approach
5. Practicality
